

Best possible ergonomic handle for driver-drill applications

Single sleeve keyless chuck
allows for easy bit installation/removal by one hand.
Chuck capacity: 1.5mm (1/16")-13mm (1/2")

Torque setting ring
Wider torque range of 1-10 N.m in clutch mode allows for versatile applications.

Mechanical 2-speed gearing

Long rigid side grip
helps to stabilize the bit for steady drilling/screwdriving.

All metal gear construction
for extra-high transmission durability

Variable speed control by trigger

In order to provide maximum thrust to the bit, the top back of the handle is ergonomically contoured and widened to perfectly fit the U-shape formed between user's thumb and index finger.

Twin LED Job light
with after-glow function

Ribbed soft grip
enables all finger tips to hold the handle securely against the strong rotational force of counter torque even in single-handed operation.

Belt clip

Battery fuel gauge
The power remaining in the battery can be indicated in 3 stages simply by pushing a button;
3 lights on : more than 50% of full battery capacity
2 lights on : 20% to 50% of full battery capacity
1 light on : less than 20% of full battery capacity

* with 4.0Ah Battery (BL1840)

Tool does not come with bit.

STRONGER

Max lock torque: 125 N.m (1,090 in.lbs)

Efficient Brushless DC motor provides higher power and productivity.

45%* increase in work efficiency compared with predecessor model

Newly-developed large brushless motor

Test comparison:

Drilled through a 38mm thick SPF with 2-9/16" self-feeding bit.

DHP481, DDF481
(Low Speed, 4.0Ah Battery)

145

predecessor model
(Low Speed, 3.0Ah Battery)

100

MORE COMPACT

Compact overall length: 205mm for increased maneuverability

20mm compact than our predecessor model

LONGER RUNTIME

More work amount than predecessor model on a single full battery charge because of no friction loss caused by brushes

Test conditions:

Drilled in a brick to a depth of 30mm with $\varnothing 8\text{mm}$
